PROFESSIONAL SUMMARY

Full-stack JavaScript developer building production web, mobile, backend, and data-driven products. I have shipped Decide, a Nigerian phone-buying intelligence platform across web, Android, backend APIs, scraping, price tracking, auth, admin tooling, SEO, security hardening, alerts, and marketplace intelligence. I am also building OfferSignal, a global ecommerce intelligence and technical trust product that combines competitor monitoring, Shopify-aware extraction, AI-assisted reports, evidence screenshots, trust audits, scheduled monitoring, agency workspaces, and payment-ready workflows. Strong fit for remote product engineering, frontend/full-stack roles, backend/API work, data automation, ecommerce tooling, and AI-assisted internal systems.

CORE SKILLS

Frontend	React, Next.js, TypeScript, JavaScript ES6+, Tailwind CSS, HTML5, CSS3, responsive UI, mobile-first UX
Backend & Data	Node.js, Express.js, Next.js API routes, PostgreSQL, Supabase, Prisma ORM, REST APIs, server-side jobs
Automation & Intelligence	Playwright, Cheerio, scraping, price tracking, structured extraction, Shopify feeds, diffing, scheduled monitoring, AI report drafting
Mobile & Delivery	React Native, Expo, Android builds, EAS Build, Vercel, Git, GitHub, Postman, Resend, payment integrations
Quality & Security	SEO, metadata/schema, performance optimization, auth flows, security headers, rate limiting, abuse resistance, audit workflows

EXPERIENCE

Full-Stack JavaScript Developer | Self-Employed

Remote / Nnewi, Nigeria | June 2023 - Present

- Build production-ready web applications and backend-backed product experiences from UI through APIs, auth, business logic, and deployment.
- Translate product requirements into maintainable architecture, responsive interfaces, reliable workflows, and clean data models.
- Delivered 5+ production-ready client projects that cannot be shown publicly due to client restrictions.
- Consistently target 90+ Lighthouse scores, mobile responsiveness, usability, and production polish across shipped work.

Founder / Full-Stack Engineer | Decide - Phone Buying Intelligence Platform

Nigeria / Remote | February 2026 - Present

- Built and launched a web and Android product that helps Nigerian buyers compare phones using live prices, marketplace risk, alerts, watchlists, and buy-or-wait guidance.
- Designed scraping and normalization pipelines for Jumia, Slot, and Jiji-style marketplace intelligence, including false-listing filtering and phone matching logic.
- Implemented backend APIs, PostgreSQL data flows, admin dashboards, Google auth, feedback systems, price sync tools, security hardening, SEO metadata, schema, and mobile/web polish.
- Built intelligence features beyond specs: price fairness, deal truth, market confidence, repair/resale context, gray-market caution, used-phone safety, and buyer-friendly recommendations.

SELECTED PROJECTS

OfferSignal - Ecommerce Intelligence & Technical Trust Infrastructure | In progress, 2026

Tech: Next.js, React, TypeScript, Supabase, PostgreSQL, Playwright, OpenAI, Resend, Paystack, Tailwind CSS, Cheerio, Vercel Cron, Supabase Storage

- Built a two-offer product for ecommerce brands and agencies: Rival Briefs for recurring competitor intelligence and Technical Trust Reviews for store trust, performance, security, and conversion checks.
- Implemented Shopify-aware monitoring with product feed pagination, collection discovery, product/variant normalization, currency extraction, stock status, compare-at pricing, catalog movement, and storefront messaging signals.
- Created an AI Merchandising Analyst report format covering biggest move, revenue risk, competitive pressure, suggested response, what not to do, evidence strength, opportunity scoring, lifecycle labels, and merchant-specific strategy context.
- Built evidence screenshots with Playwright, Supabase Storage fallback, retention metadata, highlighted evidence boxes, before/after pairing, admin previews, delete controls, signed hosted reports, and PDF-ready artifacts.
- Added admin and agency workspaces: lead pipeline, report editor, quality gate, approval/send flow, scheduled monitoring, client folders, white-label fields, client strategy defaults, legal/respect controls, and payment readiness.

Decide - Phone Buying Intelligence | Live product, 2026

Tech: Next.js, React Native/Expo, Node.js, Express.js, PostgreSQL, TypeScript, Tailwind CSS, Cheerio, Supabase, Sentry

- Shipped a production web and Android product for Nigerian phone buyers with live prices, phone analysis, comparisons, alerts, watchlists, feedback, admin tools, and buyer guidance.
- Built phone matching, price sync, marketplace intelligence, SEO/schema, auth, Android QA, security hardening, and admin workflows for ongoing product operations.
- Positioned the product as buyer-regret prevention rather than a static phone catalog, with practical signals around used-market scams, gray-market risk, repair context, and alternatives.

Full-Stack E-Commerce Platform | Completed, 2026

Tech: Next.js, TypeScript, PostgreSQL, Prisma, NextAuth.js, Stripe, Flutterwave, Redis, Tailwind CSS, Shadcn/ui, Resend, UploadThing

- Built a production-ready ecommerce store with multi-currency support, payment integrations, admin dashboard, order/product management, auth, reviews, wishlist, cart, and inventory tracking.
- Resolved serverless database pooling issues with PgBouncer and Prisma client patterns, and handled Vercel Edge constraints by moving auth protection into server-side layouts.
- Implemented secure data access by relying on Prisma/PostgreSQL connections instead of exposing Supabase auto-generated table APIs publicly.

EDUCATION

B.Sc. Human Physiology | University of Calabar

2019 - 2023

Built strong foundations in research, data analysis, scientific documentation, critical thinking, and disciplined problem solving.

CERTIFICATION

AI Career Essentials (AiCE), ALX Africa - 98.92% overall score, 2024

Full project case studies are available on my portfolio and GitHub. Deeper walkthroughs of Decide, OfferSignal, and the ecommerce platform are available during interviews.
